REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Claims 1-6, 8-10, and 13-23 are allowed in view of applicant's amendments and arguments filed on 11/05/2007, which arguments were found persuasive. While the reference to Rizescu et al. mentions computing density, the reference fails to teach indicating the presence of a high-Z substance as opposed to low and medium Z substances. Rizescu et al. appears to be mostly concerned with lower Z substances and with lower photon energies than those recited in claims 6 and 21-23. While Rizescu et al. can compute the density and Z of a material being investigated, they do not teach indicating the presence of particular high-Z substances, such as special nuclear materials; they do not teach distinguishing the presence of special nuclear materials as opposed to benign, high-Z substances. Since Rizescu et al. fails to teach the particular application recited by the applicant, the rejections in the Office action mailed on 7/05/2007 are withdrawn.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication should be directed to John R. Lee at telephone number (571) 272-2477.
